# ALFAKHER SWEDEN PREMIUM TOBACCO

BY BIZTOBIZ

Alfakher-Sweden is considered to be one of the oldest corporate houses in Sweden. It is renowned for its manufacturing excellence and high standards in quality products and services.

In many parts of the world, people use a water pipe to smoke tobacco. This is particularly true in the Eastern Mediterranean Region, where water pipes are known variously as shisha, goza, narghile, ghalyoon, or hookah.

A waterpipe works by placing a tobacco product in a small bowl with holes in the bottom which is attached to a tube linked to a water container.

When the tobacco product is heated by hot charcoal placed on the tobacco it emits smoke that the user inhales by puffing on a hose connected to the water container. This draws it through the water and into their lungs.

# WOWVEE

BY BIZTOBIZ

We're on a mission to simplify cloud computing so developers and their teams can spend more time building software that changes the world.

Even if you think you know what a competitor's strategy is from the outside, it can be hard to copy successfully unless you know all the details.

Our job goes beyond just imagining and creating beautiful digital design concepts.

Our job is also to make the product as efficient...

Start by defining the problem. Have the courage to approach a problem from a different perspective. Plan, but act decisively. Consider that the simplest approach is often the best.
